Experience

Juspay Technologies | Bengaluru, Karnataka
AUG 2023 - Present
Quality Engineer - I

JUL 2022 - JUL 2023
Quality Engineer - Contract

As a Quality Engineer at Juspay, I hold a pivotal role in ensuring the quality of our backend products. I am also responsible for automating and developing frameworks for efficient backend testing. Leading the Backend Automation Team, I foster a culture of excellence and innovation, optimizing our testing processes. I also play a key role in the DevOps process, managing the deployment and monitoring of changes to our live environment. My dedication to delivering impeccable products through automation and expertise in backend testing drives success at Juspay.

Codingmart Technologies | Coimbatore, Tamil Nadu
JUL 2020 - JUL 2023
Test Engineer

As a Testing Engineer at Codingmart, I managed multiple projects and successfully performed web, mobile, and backend testing, employing both manual and automation techniques. During my tenure, I had the opportunity to mentor and train interns, contributing to their professional growth. Additionally, I actively participated in the recruitment process, assisting in hiring both freshers and experienced candidates for the testing team. I also worked on diverse projects spanning domains such as ecommerce, insurance, resource management, gaming, payments, and more.
